Parent Input on State Assessments
February 23rd, 2024***

Parents,

The Nebraska Department of Education wants your input on annual statewide assessments administered in language arts, mathematics, and science.

We are committed to providing your child with the best possible educational experiences at the Nebraska Department of Education. As part of our assessment process, students in grades 3-8 take statewide assessments in the content areas of English language arts, mathematics, and science each year. Following the assessments, you receive an individual student report detailing your child's performance from your child's school. Your feedback is essential in helping us enhance the information provided in these reports to better support your child's academic journey. We kindly ask for your insights and suggestions to improve the clarity and usefulness of the reports you receive. Thank you for your time and contributions.

Parents, please access the link below to share your thoughts and perspective.
